

# UNC Chapel Hill 2011-2012 Waste and Recycling Trend Report Summary

April 2012

For April 2012, our overall campus recycling rate was 37% (both for the month and for the year-to-date.) This is down a bit from this time last year when our recycling rate was 41% for April and 43% year-to-date.

We are now receiving stats for used motor oil and automotive batteries. Yard waste numbers now include both actual weights. We weigh containers staged at the Grounds office for the daily collection of brush and debris. For less frequent, but heavier loads of trees, limbs or leaves, we have a new reporting method in place. Thus we now feel much more comfortable with our overall yard waste and organics numbers. For our fiber numbers, we are continuing to use averaged estimates for shredded paper from the Medical School and will update the information once we get numbers from UNC Hospital's contract administrator.

For more detailed information, visit our [Program Results website](#). Feel free to call us with questions, 919-962-7251.
