

UNC Green Labs
Meeting Agenda
Bondurant Rm. 3076
10/25/17
[Google Hangouts Link](#)

- ◆ Memo from Christina's Desk: I'm turning in my two-months-notice for Green Labs today. It's been a difficult decision but I think it's best for myself and the committee if I hand the reins over to someone else who can put more energy into things. I will be able to join in occasionally if meetings still have a remote option because I can absorb what's going on while working on other things. I really appreciate everyone's support and allowing me to lead the meetings. Much love, you wonderful human beings!
- ◆ Energy: Green Guide checklist for casual audits
 - Full list to identify priorities. - [This List](#) will be discussed at meeting. Deadline for finalization - SPRING. Possibly make into a training module instead of trying to fund a workshop? Short sweet. Maybe as a baseline and then certification/medals for reaching certain standards/goals.
 - Freezer Challenge [best practices](#) to be incorporated? (Thanks Cindy)
 - Additional Links to [freezer practices](#) (Thanks Trisha)
 - Energy section needs to be focused toward lab-controlled actions.
 - Best way to select action items most important? - Easy to implement, low cost,
- ◆ Energy: Capstone - Next steps? David Salvinson(sp) is coordinator for Institute for the Environment. Find faculty member or lecturer to be academic partner. Cindy to work with Cindy. - No updates
- ◆ Energy: VWR Freezer Rebate Program - Update on Panasonic VIP Eco or freezer testing? - Jan ship estimate for Panasonic -80 to test. We have a total of 278 -80's under service agreements on campus (even more than that overall!).
- ◆ Energy: Fume Hood with Variable Rate Inventory - Cindy is putting together a comprehensive list of these hoods and we will identify which ones need magnets. Woohoo!!! 1278 hoods! - Update?
- ◆ Volunteer needed: David Darr at Lineberger - would know lab tech listserv info. We should look at whether similar things exist at other research spots. Perhaps we need to make a contact sheet with these compiled. - Perhaps contact building managers to figure out who to contact and/or going to department webpages to find research staff emails.
- ◆ Logistics: Amy Preble reports that we are running low on recycling posters for labs. If we want to print new ones, we will need to seek funding from perhaps RESPC. Or we could brainstorm any other materials we'd like to give out at tabling events.

Next meetings: Nov 29th

10-11am Location: Bondurant 3076

Attendees:

EDIT: Christina L., Cindy Register, Obie St. George,

Regrets: Todd O'Buckley, Jessica O'Hara, Trisha Castranio (remote), Tischan Seltzer, Amy Preble
