

Water

Report any leaks to
UNC Facility Services
Work Management
immediately at
(919) 962-3456

Encourage the use of
reclaimed water for
toilet flushing and
recaptured
rainwater for
irrigation

Dual Flush Toilets

Consume water
responsibly by
taking shorter
showers and not
leaving water
running while
washing hands,
brushing teeth or
shaving

Energy and Water on Campus

A quick guide to
maintaining our resources
at UNC

Electronics

Set computers to sleep or hibernate when left unattended instead of using a screensaver

Turn off screens when away from desk

Connect electronics that can be powered down to power strips and turn off or unplug the power strips when these electronics are not in use

Unplug cell phone or laptop chargers when not in use

Use Energy Star certified appliances such as computers, microwaves, printers and televisions

Lighting

Make use of natural light instead of relying solely on light bulbs

Turn off lights when leaving an unoccupied room or building

Upgrade light fixtures to light-emitting diode (LED) bulbs

Place these stickers on all -> light switches

Temperature

Ensure that standard temperatures are maintained:

Summer 76-78° F

Winter 69-71° F

Place a work order at (919) 962-3456 when not in compliance
