Appendix M – Adjacent Property Owners  (Figure M-1)

As part of the Public Notice process associated with submittal of an IP application, the USACE requires the Applicant to supply a list of addresses for property owners immediately adjacent to the Carolina North property. The USACE uses this list to notify neighbors of their opportunity to submit comments about the application. The comment period is 30 days.

The University has requested that the USACE expand the notification area as shown on the map in Figure M-1 on the following page. The reason for increasing the extent of the request area is that it is more consistent with the University’s typical notification procedure. This area extends approximately 1000 feet from the Carolina North property line, and surrounds the entire property. A CD listing of the individual properties is also provided in... (UNC to provide).
