

# Regulated Recyclable Material Ordinance Fact Sheet

Information for Contractors  
Working on Capital Projects

The materials listed below **must** be recycled. These materials must be separated for recycling either on the jobsite (and hauled in segregated loads) or transported in mixed loads to a processing facility. Materials Reclamation in Raleigh is currently the only approved facility. **Improperly separated or disposed Regulated Recyclable Material arriving at the Orange County Landfill is subject to a surcharge of double the current landfill tip fee. C/D waste from Orange County containing regulated materials may not be landfilled in other counties.**

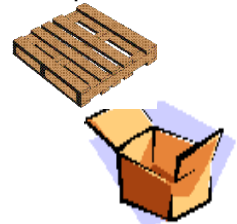

**1. Clean Scrap Metal**—Clean scrap metal and white goods may be taken to the Orange County Landfill for recycling at no charge.

**2. Unpainted, Untreated Wood Waste**—Clean wood waste includes all types of wood, such as plywood, oriented strand board (OSB), framing material, engineered beams, etc. Clean wood waste may be taken to the Orange County Landfill for recycling at \$18 per ton.

**3. Pallets**—Pallets and shipping crates may be taken to the Orange County Landfill for recycling at \$18 per ton. Additionally, arrangements can be made with local pallet companies to have reusable pallets picked up or returned to the distributor (back-hauling).

**4. Cardboard Boxes**—Cardboard has been banned from the Orange County Landfill for many years. Large loads generated by equipment deliveries should be coordinated in advance and preferably back-hauled by the contractor/distributor.

**DO NOT PLACE SCRAP METAL, WOOD, PALLETS OR CARDBOARD IN UNIVERSITY DUMPSTERS!**

In Orange County, all vehicles with a Gross Vehicle Weight greater than 9,000 lbs. **hauling waste loads of clean wood waste, metal, or cardboard**, must be covered and are required to be registered under a Recyclable Material Collection License.

Contractors may contact the Office of Waste Reduction and Recycling at 962-1442 or the Orange County Solid Waste Office at 968-2800 for assistance with construction and demolition waste management.

## Directory of Markets for Recyclable Materials
