

C-30 – VERTICAL TRANSPORTATION

General

Elevators and Stairways on campus shall be designed in accordance with the current version of the North Carolina Building Code.

Accessibility

The Designer is expected to provide a design that will comply with the current versions of the North Carolina State Building Code and the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

<http://www.ada.gov/publicat.htm>.

The University requires some elements that exceed these codes and standards. They are listed below:

- 1. Elevators shall be provided with a grab bar on at least one wall of the elevator cab.**
- 2. Platform Wheelchair Lifts shall not require a key to operate.**
- 3. Stair handrails shall have a bottom extension that extends 12" plus one tread width from the bottom nosing.**
